

## Software for Galaxy / 80-BUS systems

It is our intention to make a variety of attractively priced disks/programs available over the coming weeks/months and this is the start. The software will normally be supplied on Gemini QDSS format disks, but virtually any other format can be supplied. If you don't want QDSS format then please specify. No extra charge for any Gemini format; other formats add £1.

Each description shows the file(s) that the software is supplied as:

- .COM = ready to go, configured, executable file
- .C = "C" source code
- .DOC = documentation file, usually WordStar format, sometimes ASCII
- .MAC = assembler source code, requires Microsoft M80
- .PAS = Pascal source code

Both of the disks on offer here are for use on systems that have the Gemini GM832 SVC installed as the video board.

### Scorpio Systems Disk 1

**SDRAW** A drawing package for use with the SVC in graphics mode (256x256). Lets you draw lines, circles, boxes, etc; write text; fills with various patterns; copy with optional reflection on x or y axis. Images may be read from/written to disk (.IMG files), and are compatible with SVC-GRAPHAPAC & EPSON.COM. On-line help. Supplied as .COM file, with .DOC and sample .IMG.

**TIME** Program to display, and optionally set, time and date read from RTC on GM888 board. Also sends time to SVC's on-board "clock", and enables it so that it appears on the screen. Supplied as .COM, .MAC and .DOC.

**PTIME** Program to display time and date read from RTC on GM816 or GM822 board. Also sends to SVC (see TIME above). Supplied as .COM, .MAC and .DOC.

**NCG** Program that downloads a new character set to the SVC. .MAC file easily modified to produce further character shape variations. Supplied as .COM, .MAC and .DOC.

**PCB** A simple PCB design package using the SVC graphics mode. Allows drawing/erasing of pads (3 types), tracks, symbols (3 types), automatic IC pad layout (8 pin to 40 pin). On-line help. Maximum PCB size 3" x 3", single sided. Reads from / writes to ASCII disk files. Supplied as .COM, .PAS and .DOC.

All above files on one disk, order number - SVC-01. £12.50 inc. VAT & P&P.

All .DOC files printed out by laser printer - DOC-01. Add £1 inc. to above.

### Scorpio Systems Disk 2

**MLINKS** The source code for SVC-GRAPHAPAC. SVC-GRAPHAPAC links to Microsoft's MBASIC interpreter and adds many commands to control the various SVC capabilities directly. Could be used as the basis for adding your own commands to MBASIC for a host of other purposes. Supplied as .MAC file only. [.COM file, demonstration files, full printed documentation, and EPSON printer driver (with source) available as separate package - reference GM575+, £20 + £1.50 P&P + VAT.]

Above source file on disk, order number - SVC-02. £10.00 inc. VAT & P&P.

**SPECIAL OFFER** - SVC-01 & SVC-02 together. Order as - SVC-03. £20.00 inc. VAT & P&P.

Please send cheque with order, payable to "Scorpio Systems". Address as above. E&OE. 23/06/87
